INTRODUCTION

Our vision is bringing the connection between Real Madrid Fans in the world by providing the same cryptocurrency token. The rapidly of cryptocurrency, we cannot ignore the good opportunity to create the create project for Madridistas.

In the world, Real Madrid Fans called as Madridistas. Within this idea, we chose “**Madridistoken**” as the name of this project. This name is a combine between “**MADRID**” and “**TOKEN**” words.

Notice that this is a Real Madrid C.F. Fanmade Token project and we would like to create a long term project for the big Football Fan Community in the world.

OVERVIEW

Total Supply: 1,000,000,000 MADRID

Contract: 0xd941668473830880efcdad6b379b3c0baca89d30

Decimals: 18

BUSINESS SOLUTIONS

Until 2021, Real Madrid has nearly 500 million fans in various social networks including Twitter, Facebook and Instagram. Besides, Real Madrid have more than 90,000 registered socios as of 2021 and continue to be one of the most popular football clubs in world.

Within more than 500 million fans but the problem happens when connecting between Real Madrid Fans in the world. There are a lot of limitation between different Real Madrid Fans such as location, language, culture, time, gender, politics... Why don't we think about one currency which all Madridistas can use to make any transaction easily?

By providing Madridistoken, all Madridistas can make transaction easily and rapidly between different Madridistas in different exchange platforms.

Scenario:

You own a T-Shirt Number 7 with a signature of Cristiano Ronaldo. Then you want to sell to other Madridistas in other countries with price \$1,000 USD. There is no problem happens if you pay by USD, but all of us may use other currency as EURO, AUD, NDT, SGD.... Then we need to charge exchange fee to convert from our currency to USD (**For example, 1 AUD + 4% fee exchange = 0.71 USD**). Besides, the transaction must be controlled by central bank, which taking waste time.

Solution:

By providing Madridistoken (MADRID), all Real Madrid Fans can make transactions between fan to fan easily with exchange fee. We can use same Madridistoken to buy, sell, exchange easily on any platform. Besides, we are able to send Madridistoken directly to wallet of other persons without fees. That is the good benefit of cryptocurrency and Madridistoken for Madridistas.

TOKENOMICS

In this project, we will keep 10% for burning depending on the progress of project. However, this is optional to develop project. The internal team has 10% of token but we will lock these tokens 10 years for developing project. Investors or supporters own 10% tokens because their support and investment in initial phase. On another hand, 20% tokens for foundation reverse, these tokens are using of maintain project, support marketing, send to some famous speakers to promote project, upgrade token code. When sending for marketing or famous persons, we will lock token at least 1 year to prevent drug pulls problem. 50% of total supply will be sell public in exchange platforms.

TOKEN DISTRIBUTION

TECHNICAL

This project is developed by BEP-20 standard on Binance Smart Chain. This is simple an extension of ERC-20. We can read more details about BEP-20 as the following:

BEP-20 is a token standard on Binance Smart Chain that extends ERC-20, the most common Ethereum token standard. You can think of it as a blueprint for tokens that defines how they can be spent, who can spend them, and other rules for their usage. Due to its similarity to Binance Chain's BEP-2 and Ethereum's ERC-20, it's compatible with both.

BEP-20 was conceived as a technical specification for Binance Smart Chain, with the goal of providing a flexible format for developers to launch a range of different tokens. These could represent anything from shares in a business to dollars stored in a bank vault (i.e., a stablecoin).

Of course, one could equally create a native asset as a BEP-20 token, or even peg tokens from other blockchains to make them usable on Binance Smart Chain. This is what's done with "Peggy" coins, which are essentially BEP-20 versions of other crypto assets (such as LINK or XRP).

Like BEP-2 tokens on Binance Chain, BEP-20 token transfers are fuelled with BNB. This provides an incentive for validators to include the transactions in the blockchain, as they'll collect the BNB as a fee for their troubles.

Functional of this token:

- **Can Burn (Yes):** This token can be burn manually by owner of this token.
- **Can Mint (No):** We do not implement mint feature for this token. So the maximum total supply of this token is 1,000,000,000 (1 billion)
- **Can Pause (Yes):** This feature is useful during malicious attacks or incidents where platform become vulnerable. We will never use this feature if everything is working fine, so holders do not worry about this feature. This feature will be used when having any attack or broken problem to prevent the lost money of holders.

COMMITMENT

Team Commitment

The development team is hiring from external professional company, so they have enough skills and knowledge to develop and resolve any problem of this project. 10% internal tokens of internal teams are locked 10 years, so we do not worry they will sell all in short time.

We are still looking for good investors at first stage of project. When negotiate with investors, we will lock their tokens and release depending on percentage and time of project.

On another hands, we commit follow the roadmap and tokenomics of this project. Although there is some problem or risk of project, but we have a back-up plan to resolve the project immediately.

Safety

Madridistoken is a long-term investment project, and it will reach more than \$1 soon. We open this project because of building fair community for all Madridistas.

In the future (2-3 years), we will consider renounce ownership of this project if we do not need to update any code changes of project. At that time, project will become more secure because the trending of project will depend on the community. However, we will continue to promote the project by using 20% holding tokens.

A whale dumping will harm the value of Madridistokens but we trust the Madridistoken Community can help recover easily because the Real Madrid C.F. is the most popular football club in the world.

CONCLUSION

Thank You:

We want to send a big thanks message to all holders and supporters for this project. In the cryptocurrency community, we have a lot of scams, but the community is still trusting the future of cryptocurrency. Thank you so much
