## INTRODUCTION

Our vision is bringing the connection between Real Madrid Fans in the world together by a same token. The rapidly of cryptocurrency, we cannot ignore this opportunity to create the great project for Madridistas.

Public Sales

Total Supply  
1 Billion

50%

## BUSINESS SOLUTIONS

Until 2021, Real Madrid has total 500 million fans in social networks include Twitter, Facebook and Instagram. Besides, Real Madrid had more than 90,000 registered socios as of 2021 and continues to be one of the most popular football clubs in the world. Within more 500 millions fans in the world, but Real Madrid does not have any the way to connect between Real Madrid fans in the world because we are living in different countries, speak different languages, use different currency.

Because of the different culture, currency and languages, it will make difficult for any transaction between customer to customer, fan to fan.

### **Scenario:**

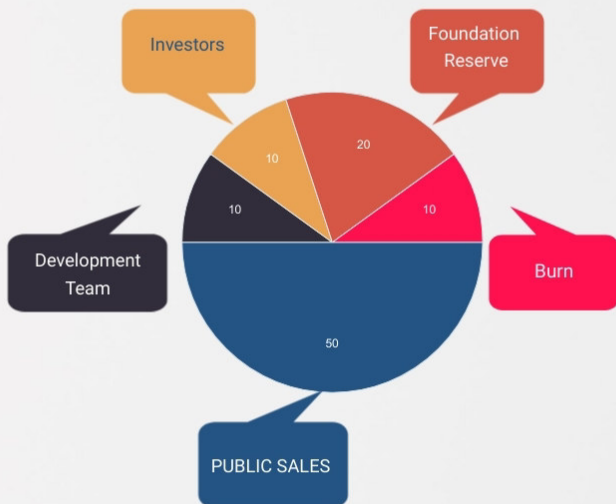

*You own a T-Shirt Number 7 with Signature of Cristiano Ronaldo. Then you want to sell to other Madridistas in other countries with price \$1000 USD. There is no problem happens if your currency is USD but almost people are using other currencies as NDT, EURO, AUD,... Then you need to charge exchange fee to convert from your currency to USD (For example, 1 AUD + 4% fee exchange = 0.71 USD).*

### **Solution:**

By providing MADRID token, all fans in the world can make transaction between fan to fan easily without transaction or exchange fee. You can use same MADRID to buy or sell easily on any platforms or you can transfer directly to wallet of other people without waiting processing from a bank or any centre.

# TOKENOMICS

## TOKEN DISTRIBUTION

# TOKENOMICS

## TOKEN DISTRIBUTION

- 10 % of the development team for team effort.
- 10% of investors support our team in the initial stage. Our investors keep their tokens for 5 years. These tokens are locked in 2 years and will be distributed 20% each month.
- 20% of tokens for Foundation Reverse. These tokens have never been sold in the market. We will use these tokens to develop, promote and upgrade our project in the future.
- 10% for burning in the future depending on the price of the project.
- 50% for public sales and price depending on the market.

## ROADMAP

**Q1**  
2022

- Complete Madridistoken Website
- Marketing on social networks
- Reach first 1000 holders

Reach 100,000 holders  
Apply on first crypto exchange  
Plan to burn 5%

**Q4**  
2022

- Reach 500,000 holders
- Continue do marketing with famous sport speakers
- Continue improve system

# COMMITMENT

## TEAM COMMITMENT

We develop this project because love of Real Madrid Community, so we commit that we will follow exactly timeline, roadmap and rules of projects.

We are a strong development with good collaboration. We are self-management team with good enough skills to provide potential useful product.

## SAFETY

Madridistoke is the long-term investment project. We open this project because we want to build the fair community for all Madridistas in the world.

Owner of this project keep 20% of tokens, but we have never sold these tokens because we keep them for marketing in the future. In the long-term, we will renounce ownership if we don't need to update code of this project. At this time, this project will continue depending on community.

A whale dumping will harm the value of Madridistokens but we trust the Madridistoken Community can help to recover easily because of the Real Madrid is the most popular football club in this world.
